

## 1 Agenda

1. Introduction
2. Pre-meeting remarks
3. Discuss description document
4. Presentation
5. Start requirements documents
6. Questions
7. Closing

## 2 Agreements

### 2.1 Presentation

Thomas presents.

- Use images, problem description (why is there a need?), mention similar applications (list the cons!).
- Mention thing we know we won't have but are great additions. (not necessary or too hard)
- Should be clear for the responsible teacher what and how our project will be. Everything should be mentioned!

### 2.2 Requirements document

VERY precise! A couple of paragraphs about the application and the rest should be technical. Both user- and software-requirements. Details will be communicated. Link to example will be sent.  
(Temporal) task division:

- Textual stuff - Nick
- Rest of requirement document - Perry, Ziad
- Prototyping (preferably less experienced Android programmers.) - Guus, Tasos, Thomas  
Quick and dirty program an app which works. Button-layout, UI, basic functionality. Think about chatting, databases, servers etc. Figure out the trade-offs. Prototype user-interface, should be in the document!

## 3 For next time

Next meeting on: Thursday Feb 12, 14:00

Chair: Guus Secretary: Ziad

## 4 Additional remarks

Hand in description document: wait for mail from tutor.

Description document:

Both **pros** and cons of similar apps should be mentioned. No further remarks.
