Minutes of meeting 26-3-2015

Chair: Tomas
Secretary: Perry

Other attendants: Tasos and Jimmy.

Meeting started at 14:00.

Additions to the agenda:
-Logbooks
-Peer reviews
-User manual

Implementation:
 - Tomas is working on his part and has to do, still has to do (a lot he thinks) UI and connection to the database.
 - Back-end done except for demo data

Timeframe:
 -Final presentation and deadline: end of second exam weeks.
 -Next week thursday (May 2) we have the acceptance test.
 -This weekend: testing plan and user manual.

User manual:
Explain the functionality of the application very easily but make sure it covers the basic functions.
Like the manual of an alarmclock.
Preferably include some screenshots. Tailor to what a user wants.

Acceptance test:
Steps to be done to see if all must-haves are met. Should be very specific. We should try it ourselves.
We should finish the app on the acceptance test
date, otherwise we will have to work during the exam week.

Logbooks:
People are far behind, make sure you fill them in!

Peer reviews:
Only three people handed them in. No point in talking about it with only the three of us here this is a screenshot of the results:

Removed row 19 in matrix, probably bogus

Cor.: correction final grade (= Dev/2)
I guess the other peer review contributes to the correction for the other half

Work division:
Tomas: Hitch fragment, once done check Trello.
Tasos: User manual, Trello once done.
Perry: Acceptance test now, work on demo data for database afterwards.
Ziad: Finish maps and look at trello afterwards.
Nick: chat prototype and other implementation.
